Re: Class Certification of Esports Total Maps Swaps Pursuant to Section 5c(c) of the Commodity Exchange Act and CFTC Regulation 40.2(d)

Dear Sir or Madam:

Pursuant to Section 5c(c) of the Commodity Exchange Act (the "Act"), 7 U.S.C. § 7a-2(c), and Commission Regulation 40.2(d), 17 C.F.R. § 40.2(d), Ludlow Exchange, LLC ("Ludlow" or the "Exchange"), a registered designated contract market doing business as Novig, hereby certifies a class of Esports Total Maps swaps (the "Class") for listing on the Exchange.

A description of the Class and the certifications required by Regulation 40.2(d) follow:

The Previously Certified Contract. On November 10, 2026, the Exchange submitted and certified the Esports Total Maps Contract pursuant to Commission Regulation 40.2(a), CFTC Submission No. 2611-1016-4545-95 (the "Previously Certified Contract"). The submission included the complete terms and conditions governing the Previously Certified Contract, including its pricing sources, formulas, procedures, and methodologies for determining reference values and payment obligations.

The Class. Each particular swap within the Class is an event contract based on the number of Maps Played during a specified professional esports series. Each swap will be governed by the terms and conditions of the Previously Certified Contract. The values assigned to <game title>, <organizer>, <esports event>, <match>, <team 1>, <team 2>, <format>, <time period>, <count>, <comparison operator>, and <date> may vary among swaps within the Class and will be specified by the Exchange before the applicable swap is listed. No other term affecting the pricing source, calculation of the reference value, payment obligations, settlement procedure, or settlement currency may vary among swaps within the Class.

Identical Pricing Sources and Methodology. Each swap within the Class will use <organizer>, the tournament organizer and governing body of <esports event> (Riot Games[1] for the Previously Certified Contract), as the Source Agency and the identical source hierarchy specified in the Previously Certified Contract. The reference value is the number of Maps Played during <time period> of <match>, as recorded by the Source Agency, counting each Map on which play began and reached a recorded result once. If that number is <comparison operator> <count>, where "above" means strictly greater than and "below" means strictly less than, the YES side receives the $1.00 Settlement Value; otherwise, the NO side receives it. Because <count> is always a half-integer, the number of Maps Played can never equal it,

[1] Riot Games is not affiliated or associated with Ludlow Exchange, LLC. Neither Riot Games nor any of its affiliates sponsors, endorses, sells, promotes, approves, or is otherwise involved with this Contract or any other product offered by Ludlow Exchange. Any reference to Riot Games is solely for purposes of identifying the underlying event and the applicable settlement source.

no tie is possible, and every swap resolves YES or NO. Under the Expiration Value Determination Rule, where <match> is subject to Abandonment, the swap settles on the number of Maps Played recorded by the Source Agency at the time play ended. A swap settles to Void where its Expiration Value and Payout Criterion cannot be unequivocally determined under that Rule, and as provided in the Scheduling and Postponement Rule, the Format Change Rule, the Forfeit Rule, the No Result and Data Availability Rule, the Extraordinary Circumstances Rule, and the General Market Suspension Rule. Any Void or fair-value settlement will be determined under the identical Fair Value Settlement Rule, including the same Reference Time, Calculation Window, Fair Value Price composite and normalization methodology, Data Integrity exclusions, Fallbacks, and Settlement payment allocation. Each swap will be denominated and settled in United States dollars.

Certifications. Pursuant to Section 5c of the Act and Commission Regulations 40.2(a)(3)(iv), 40.2(a)(3)(vi), and 40.2(d), the Exchange hereby certifies that:

(i) each particular swap within the Class is based upon an excluded commodity specified in Commission Regulation 40.2(d)(1), specifically an occurrence, extent of an occurrence, or contingency within Section 1a(19)(iv) of the Act;

(ii) each particular swap within the Class is based upon an excluded commodity with an identical pricing source, formula, procedure, and methodology for calculating reference prices and payment obligations;

(iii) the pricing source, formula, procedure, and methodology for calculating reference prices and payment obligations in each particular swap within the Class are identical to those used in the Previously Certified Contract;

(iv) each particular swap within the Class is based upon an excluded commodity involving an identical currency, the United States dollar;

(v) each particular swap within the Class complies with the Act and the Commission's regulations thereunder; and

(vi) concurrently with the filing of this submission, the Exchange has posted on its public website at *https://www.ludlowexchange.com/filings* a notice of pending class certification and a copy of this submission.

Submission Timing. The Exchange has filed this submission electronically through the CFTC Portal and will not list or facilitate trading in any swap within the Class unless the Commission has received this submission by the open of business on the business day preceding the listing, as required by Commission Regulation 40.2(a)(2).

Sincerely,

Calvin Smith
